EXPERIENCE

Frontend Developer

Desun Technology Pvt. Ltd. Kolkata, West Bengal January 2025 - Present

- Collaborated with backend teams to integrate APIs with UI components, ensuring seamless user experiences and data flow.
- Optimized legacy frontend code for performance and maintainability, reducing load times and improving code readability.
- Followed component-based architecture and clean coding practices to build maintainable, reusable, and scalable UI components.
- Used tools like Postman for API testing/documentation and Git for version control and collaboration.
- Deployed frontend applications using Git and GitHub, leveraging CI/CD workflows with Vercel and Netlify for automated builds and seamless production updates.

PROJECTS

Colonial Reality

[🔗 View Project](#)

- Interactive Google Maps UI with smooth zoom in/out, drag-to-pan, and automatic bounds detection to refresh visible listings.
- Dynamic, multi-criteria filters (city, neighbourhood, price, beds, etc.) wired to Redux Toolkit, updating map markers and side-panel cards in real time.
- Custom markers & info pop-ups that reveal price, thumbnail, and quick-view actions directly on the map.
- Google Places Autocomplete for city/area search, delivering instant, prediction-based location input.
- Auth-protected dashboard plus a lightweight CMS for agents to add, edit, and publish property data, images, and geolocation.
- Fully responsive & performance-optimised UI built with React, Next.js, MUI, and Tailwind

Verbilab - AI content Creation

[View Project](#)

- Developed full dashboard UI (<https://verbilab.com/dashboard>) in just one week, matching Figma designs with pixel-perfect precision using Next.js and MUI.
- Implemented authentication and protected routes, restricting dashboard access to logged-in users only.
- Built a responsive and modular layout with reusable components including sidebar, navbar, content cards, and modals.
- Integrated RESTful APIs to render user data, content generation history, and usage metrics dynamically.
- Deployed on Netlify using CI/CD workflows for automatic production updates from GitHub.

EDUCATION

BA. in History Honours

CGPA: 7.20/10.0

Certificate in React.js Development (Webskitters Academy)
