Project

● SwiftBuy – E-Commerce Product Cart System

Tools: HTML5, CSS3, JavaScript, REST API, DOM Manipulation, LocalStorage

- Developed a fully responsive e-commerce frontend named SwiftBuy, using HTML, CSS, and JavaScript.
- Integrated dynamic product data from a public REST API with features like search, view details, and cart management.
- Implemented real-time UI updates and localStorage for cart state persistence across sessions.

● Hospital Management System (Spring Boot + PostgreSQL)

Tools: Spring Boot, JPA, Hibernate, PostgreSQL, Swagger, Postman

- Developed a full-stack backend application with entities like Hospital, Branch, Patient, and AppointmentRecords using Spring Boot and JPA.
- Implemented One-to-Many and Many-to-One mappings with proper validation, exception handling, and clean API structure.
- Documented and tested all RESTful APIs using Swagger and Postman for smooth client integration.
