PROJECTS

Amazon clone using HTML, CSS, JavaScript |

Amazon clone app is a mobile application that replicates the functionality and features of the popular e-commerce platform, Amazon. It allows users to browse and purchase products, track orders, leave reviews, and more, just like on the original Amazon website

Weather prediction using python and ML fundamentals |

Weather prediction using Python and machine learning involves leveraging historical weather data and machine learning algorithms to forecast future weather conditions. This process typically involves collecting, cleaning, and preparing weather data, selecting appropriate machine learning models, training the models on historical data, and evaluating their performance. Finally, the trained model can be used to make predictions about future weather.

EXPERIENCE

Worked as a Content Developer at I Global Impact ITES Pvt. Ltd., where I created product related content and occasionally handled client communication and requirements.

ACHIEVEMENTS

Organized a seminar on ambient and assistive technology in B. Tech

CERTIFICATIONS

Certification for publishing research paper (**JETIR**)

National institute for technical training and skill development (**NITTSD**)

Certification for completing free code camp frontend libraries
