RPA UiPath Certified Associate Developer

PROFESSIONAL SUMMARY

- 4.3 years of overall experience in IT and 3 years of experience with RPA Development in Prod & QA Environments.
- Development of Bots using UIPATH to automate the Tedious and repetitive tasks.E2E Implementation
- Integrating process design and RPA technology to create efficient business solutions that meet customer's functional and cost objectives.
- Competent in understanding the Business Requirements, analyzing and providing Solutions
- Sound knowledge in agile methodology and Supporting, development teams as they develop and deploy new technologies to improve Monitoring capabilities in a very diverse technology stack that requires a high level of adaptability to keep up with an agile development team.
- Experienced in developing technical documentation in various stages of Software Development Life Cycle (SDLC).
- Expertise on UiPath Studio to design a Sequence, Flow Chart, State Machines and RE Framework.
- Working knowledge on debugging a workflow, managing the packages, creating variables, arguments, and control flows
- Working on various projects of Robotic Process Automation- Web, Outlook, Excel, OCR, & SAP, ServiceNow, Business analysis and optimization and IT systems implementation for various.
- Well versed knowledge in creating PDD, SDD documents for the Automation processes.
- Involved in Development, Testing and production environments while deploying Bots.
- Provided Production support for all the existing bots and do enhancements as per client requirements
- Maintained both Attended and Unattended Robot resources, and provided centralized Robot logs, deployment, monitoring, remote Execution, Scheduling and Work Queues using Orchestrator
- Expertise in Trouble shooting and Bug Fixing.
- Understanding on Orchestration manage
- Excellent Communication and Interpersonal skills.

PROFESSIONAL EXPERIENCE

Company	Role	Duration
SOA IT Solutions Pvt Ltd	Software Engineer	13-06-2022 to Till Date
Globsyn IT Services Pvt Ltd	Process Analyst	01-01-2021 to 04-03-2022

PROJECT DETAILS

Project Name: [PO Closure](#)

Project Description: Developed an automated bot architecture solution to handle PO Closure order received via shared mailbox as Catalog task in ServiceNow and verified the details using Email automation & going forward performed validation of PO(s) in SAP based on T codes & closing the PO(s) & resolving the Catalog task in ServiceNow.

Responsibility:

- Participated in requirement analysis, design & development status with clients, and also with infra team in configuring shared mailbox
- Coding and unit testing for project
- Extensive defect fixing and support in hyper care phase

Technologies: UiPath, ServiceNow, Excel, Outlook, SAP

Project Name: [SAP BOBJ Repots](#)

Project Description: The bot has to open a dedicated calendar & based on business required dates it'll open 3 different reports in SAP BOBJ going forward applying the business defined parameters of values which needs to be reflected in the reports. Finally downloading followed by saving the reports in dynamically created folder location in SharePoint using API & Sent out Email.

Responsibility:

- Participated in requirement analysis, design & development status with clients, and Dev team in weekly calls as and when required
- Coding and unit testing for project

Technologies: UiPath, Share Point, SAP BOBJ, Excel, Outlook

Project Name: [Tableau Migration Automated](#)

Project Description: Developed an automated bot architecture solution to handle the Tedious Migration process of Tableau DEV to Production by performing multiple validation steps in input file provided by the end users. BOT to open Tableau WEB both Development & Production followed by validating the size, location, site, datasources after that downloading the .twbx file. BOT to open the .twbx file in Tableau desktop to correctly remapping all the location, site, datasource, thumbnails etc. Followed by publishing Workbook & Datasource(New & Existing) in Production location. There after the Refresh also performed.

Responsibility:

- Participated in requirement analysis, design & development status with clients, and also with infra team in configuring Tableau
- Coding and unit testing for project
- Extensive defect fixing and support in hyper care phase

Technologies: UiPath, Tableau Web, Tableau Desktop, MIT karberos ticketing tool, SQL, Shared Folder, Excel, Outlook

Project Name: [Proset project creation for PMO](#)

Project Description: The BOT has to trigger based on the input file availability from the end user followed by reading the input file which is consisting details of MSPe & COB. Based on details BOT launch MSPe BOB sharepoint portal & creates the project in MSPe & track the project in COB by send out final notification email to Business Unit.

Responsibility:

- Participated in requirement analysis, design & development status with clients, and Dev team in weekly calls
- Coding and unit testing for project

Technologies: UiPath, SharePoint, Shared Folder, Excel, Outlook

EDUCATION DETAILS

Bachelors of Technology

Maulana Abul Kalam Azad University of Technology, Kolkata

- Specialization in Electronics & Communication

Diploma in Electrronics & Telecommunication

WBSCTE, Kolkata

- Specialization in Electronics & Telecommunication

DECLARATION

I hereby declare that the information mentioned above is true to the best of my knowledge and subject to verification.
