

Frontend Developer (Next.js) for E-commerce Platform

Project Duration: 6 months initial contract (possibility of extension based on performance)

Experience Level: 4+

We are seeking a skilled Frontend Developer with 4+ years of overall experience in frontend for a Marketplace platform development project.

Required Skills & Experience:

- Minimum 4 years of professional experience in frontend development
- Advanced proficiency in Next.js, React, and modern JavaScript
- Strong understanding of responsive design principles and cross-browser compatibility
- Experience with REST APIs and state management solutions
- Proven track record of building performant, scalable web applications
- Experience with version control systems (Git)

Preferred Qualifications:

- Previous experience with marketplace or e-commerce platforms
- Knowledge of SEO best practices and performance optimization
- Experience with Stripe payment gateway integrations
- Portfolio demonstrating relevant e-commerce projects

Responsibilities:

- Develop and maintain frontend components using Next.js
- Implement responsive designs and ensure cross-browser compatibility
- Optimize application performance and loading times
- Collaborate with backend developers for API integration
- Write clean, maintainable, and well-documented code
- Participate in code reviews and technical discussions
